

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

AN EPHEMERIS,
SHEWING THE CORRESPONDING DATES
ACCORDING TO THE
ENGLISH, HINDU AND MUSULMAN CALENDARS,
FROM A.D. 1751 UNTIL 1850.

COMPILED BY ORDER OF GOVERNMENT,

UNDER THE DIRECTIONS OF

CHARLES PHILIP BROWN,

MADRAS CIVIL SERVICE.

MADRAS:

**PRINTED BY REUBEN TWIGG, AT THE CHRISTIAN KNOWLEDGE SOCIETY'S
PRESS, CHURCH STREET, VEPEY.**

1850.

223 d. 23.

1

PREFACE.

HAVING now printed CYCLIC TABLES of Hindu and Mahomedan Chronology, I have caused a Hindu Astronomer to frame the present volume, shewing the monthly and weekly notation for a century, beginning in A.D. 1751. The utility of such an Ephemeris to persons in business is obvious.

A volume on a similar plan was prepared under the directions of Mr. Reid the Registrar to the Court of Sudr Udalut in Calcutta: and brought down from A.D. 1764, to A.D. 1835. It gives only one or two days in a week and omits the lunar reckoning which is essential in Hindu dates. In the earlier part of the work, from A.D. 1764 until 1778 that volume is not always correct.

I will prefix the corresponding pages of the Cyclic Tables, with a brief explanation; referring the reader for further details to the preface to those Tables.

MADRAS,
20th April, 1850. }

C. P. BROWN.

EXPLANATION OF THESE TABLES.

The first column states the English date and day of the week. The second gives the Telugu year: with its name. According to the æra of Vicramaditya it has one numeral, used in Bombay: according to (S.S.) the Salivahana Sacam it has another numeral, used at Madras.

The order of Titles used in Bengal, at present precedes the Southern reckoning by eleven years. Thus A.D. 1850 is in Madras called Sadharana, the 44th Title. But in Bengal it is Durmati the 55th Title.

Each month is divided into the Bahula or Wane, and the Suddha or Bright fortnight. The lunar deviates from the solar reckoning: thus the same solar day sometimes includes the first hour of two lunar days. Hence some days are marked 12-13, &c. The last day of each lunar month is marked 30: which sometimes follows the 14th day or close of the fortnight.

A *tithi* or lunar day deviates from a solar day. For a *tithi* is that period during which the moon travels through twelve degrees of her path. It may commence at any hour or moment of the day or night. It is divided into a number of *gadiyas* or Telugu hours: of twenty-four minutes each. And there are from 54 to 66 such hours in a day, according to the length of the *tithi*.

Each lunar month has the *Sucla Paxam* (or Suddha) which is the bright half beginning with the new moon. The dark fortnight, or Wane, (called Krishna Paxam or Bahula) commences with Full moon. Each half contains fourteen days and the day of change. The names of the days will now be given.

Increase.		Decrease.	
Pádyami or new moon		Pádyami	1st
Vidiya	2d lunar day	Vidiya	2d
Tadiya	3d	Tadiya	3d
Chauthi	4th	Chauthi	4th
Panchami	5th	Panchami	5th
Shashthi	6th	Shashthi	6th
Saptami	7th	Saptami	7th
Ashtami	8th	Ashtami	8th
Navami	9th	Navami	9th
Dasami	10th	Dasami	10th
E'cádasi	11th	E'cádasi	11th
Dwádasi	12th	Dwádasi	12th
Trayódasi	13th	Trayódasi	13th
Chaturdasi	14th	Chaturdasi	14th
Punuami or Purnami, that is, full moon.		Amāvasya, change.	

In the next column the Tamil date is given: deviating both in names and initial dates from the Telugu method. The days are reckoned not in lunations but regularly from one to 29 or 30. In the weeks the days agree, but bear different names.

In this column the year of the Kali Yugam is also marked.

The Fourth column gives the dates according to the style named from Collam (which we call Quilon) in Malayala.

The last column explains the date of the Hejri, used by Musulmans. Herein every (F) Friday is marked.

ON THE HEJRI, FASLI, VILAYATI AND SAMVAT.

The Musulman Æra named Hejri was introduced into the Indian Peninsula about A.D. 1600; and the Fasli reckoning cannot be discovered in any document earlier than A.D. 1650.

The Hejri system, which I have printed according to Warren's Tables, was clearly intelligible: but out of this arose the Fasli, or "harvest" which very probably was intended to suit the Hindu method. The year A.D. 1800 was Hejri 1215, but the Fasly year was 1209, being six years less. In 1850 it is seven years less.

The Hejri year, of 360 days is used only by Musulmans: who use no other method.

The Fasli is used solely by Hindu clerks in the East India Company's service. During the Musulman government the Fasly was loosely used: thus the year Krodhi (A.D. 1784) is Fasli 1193, but in some documents is 1194. The year Saumya (A.D. 1789) is numbered Fasly 1198; but in some places this becomes 1196, and elsewhere 1199.

About the year A.D. 1800 when the country became subject to the English; the Fasly year happened to commence on the 13th of July. Whereupon the English constituted that day as the beginning of the Fasly year: which hereby was metamorphosed into a solar reckoning: but devoid of months: being a mere official year. The Hindus at the present day (only the clerks in Government employ) quote the Fasly by the last two figures alone. Thus A.D. 1820 is called "Fasly Twenty-nine" (AF. 1229); which it is the fashion to mention in Hindustani numerals: thus "Untis Fasly" means 1229. And Fasly 1239 (A.D. 1830) is called Untalis Fasly: that is, 1239.

Thus in Munro's Report (26th July 1807, Fifth Report p. 785) he speaks of the Survey rent in 1215 (meaning Fasly 1215, that is, A.D. 1806;) and 1217, 1218, meaning A.D. 1808 and 1809.

Among the Inscriptions and other documents collected by Mackenzie there are a few which state the Hejri date in Arabic numerical words. Thus (written in Canarese characters) sittu, sabaa'in alaf=6+70+1000 that is, AH. 1076.

It appears that the "Vilayati" (Willaieti) and Sambat (Samvatsara) used in Bengal are nearly the same as the Fasli. Thus the First Regulation of A.D. 1793 is dated the "1st of May; answering to 21st of Bysaak (Vaisakha) 1200, Bengal æra; 21st Bysaak 1200 Willaity; 6th Bysaak 1200 Fusly: 6th Bysaak 1850 Sumbut; and 19th Ramzan 1207 Hegeree [5th Rep. p. 738.]

Tippoo Sultan wished to abolish the Hejri reckoning, calculated from the flight of Mahomed: substituting a new era reckoned from Mahomed's birth. He also wished to use the Hindu Cycle of sixty years: giving each year a new name; wherein the letters were to express the numerals, ten, fifteen, fifty-five and so forth. After awhile he again altered his plan. But the system did not survive its inventor. It is sufficiently explained in the Preface to Kirkpatrick's "Select Letters of Tippoo Sultan."

POSTSCRIPT.

The Compiler has requested me to publish the following notice regarding himself.

‘Having now printed Cyclic Tables of Hindu and Mahomedan Chronology, I have caused a Hindu Astronomer, named Vencata Soobramanya Siddhanti, son of the late A’dishésa Siddhanti, a Hindu Astronomer employed in the College of Madras, to frame the present volume, shewing the monthly and weekly notation for a century beginning in A. D. 1751. The utility of such an Ephemeris to persons in business is obvious. A second volume has been prepared, extending to A. D. 1900.’

THE END.
